# **ADDITIVE MANUFACTURING IN A NUTSHELL – A Crash Course for Decision Makers 2.0**

More information  
about the course on

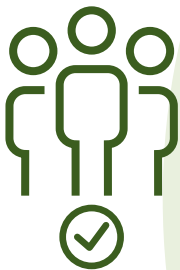

## ABOUT THE COURSE

During this tailor-made certificate course, designed and certified by two higher education institutions, Carinthian University of Applied Sciences from Austria and Faculty of Polymer Technologies from Slovenia, you will get the opportunity to learn about AM technologies, including basic understanding and pros and cons of all available technologies, current applications, implementation and running costs, new developments and emerging technologies. You will acquire first-hand experience and practical knowledge from renowned experts from the industry and academia. During the course you will be able to meet and become part of network of companies and academic institutions involved in AM at all levels.

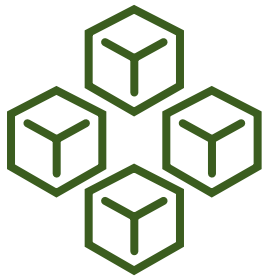

### GOAL

To provide the keys to decide where, when and how to implement AM technology in your company.

### TARGET GROUP

Senior experts and/or decision makers from the industry (with technical background).

## MODULES

**Module 1:** The big switch to AM technologies.  
What you need to know!

**Module 2:** Hands-on!

**Module 3:** Functional Designs & Emerging  
Technologies in AM

## OVERVIEW

**Language:** English

**Time Plan:** Twice a month on Fridays,  
from October 2025 to March 2026.

**Organisation:** In order to facilitate the participation of professionals, the course will be held every other Friday over a span of five months. To ensure the quality of the training, we will limit enrollment to a maximum of 15 participants.

### Location:

- ▶ **WOOD k Plus**, Klagenfurter Straße 87-89, 9300 St. Veit an der Glan, Austria
- ▶ **GPS-Kärnten**, Europastraße 9, 9524 Villach, Austria
- ▶ **CUAS**, Europastraße 4, 9524 Villach, Austria
- ▶ **FTPO**, Ozare 19, 2380 Slovenj Gradec, Slovenia
